# Executive Summary

Accessibility Audit Summary

WHITE LABEL 

## Quick Summary

**Good news:** Your website is **86% accessible** - above industry average! We found **37 issues** that need fixing to make it accessible to everyone.

These fixes will help more people use your website and protect your business from legal risks.

## Main Issues to Fix

### MOST IMPORTANT

#### Images must have alternate text

Ensures `<img>` elements have alternate text or a role of none or presentation

Urls : <https://www.abccorp.com//>

# Audit Matrix

Detailed Audit Matrix

WHITE LABEL 

## Overall Compliance

### OVERALL COMPLIANCE

**86% Compliant**

Good compliance rate.

How is this percentage calculated?

The compliance percentage shows how many accessibility rules your website passed out of all applicable rules. For example, if 33 rules passed out of 36 total applicable rules, that's 92% compliance. Rules that don't apply to your website (like video captions when you have no videos) are not counted.

### APPLICABLE TESTS

**261**

Tests that apply to your website

### PASS RATE

**86%**

Percentage of applicable tests passed

### WCAG LEVEL

**2.1 AA**

Standard being tested against

## Issues Requiring Action

### TOTAL ISSUES FOUND

**37 Issues**

These issues prevent full WCAG 2.1 AA compliance and should be addressed.

### CRITICAL ISSUES

**6**

Blocks task completion

### SERIOUS ISSUES

**12**

Major barriers to accessibility

### MODERATE ISSUES

**11**

Noticeable friction for users

### MINOR ISSUES

**8**

Small usability gaps

# Testing Methodology

Testing Framework & Approach

We use automated scans and hands-on reviews to measure your site against WCAG 2.1 AA and prioritize fixes.

-  **Audit scope and testing parameters** : We test key pages, navigation, and forms on desktop and mobile across your site.
-  **Testing tools and framework details** : We pair axe-core scans with manual keyboard, contrast, and screen-reader checks.
-  **WCAG standards and compliance criteria** : All findings are measured against the WCAG 2.1 AA standard used by most organizations.
-  **Methodology and testing approach** : We plan pages, scan automatically, verify manually, document fixes, and retest to confirm improvements.

Pages Affected

## Issues by Severity

# Issues by Category

Accessibility Issues Grouped by Type

WHITE LABEL 

## Issues by Category

### Color & Contrast

**93** instances

1 page affected

*Issues related to color contrast ratios, text visibility, and color-dependent information.*

### Structure & Semantics

**61** instances

1 page affected

*Problems with HTML structure, heading hierarchy, landmarks, and semantic markup.*

### Media & Content

**12** instances

1 page affected

*Issues with images, videos, audio content, and alternative text requirements.*

# Most Common Issues

Top Accessibility Issues by Frequency

---

## Most Common Issues (Page 1 of 2)

1

### Elements must have sufficient color contrast

Serious

93 instances across 3 pages

*Ensures the contrast between foreground and background colors meets WCAG 2 AA contrast ratio thresholds*

2

### All page content should be contained by landmarks

Moderate

45 instances across 3 pages

*Ensures all page content is contained by landmarks*

3

### Images must have alternate text

Critical

12 instances across 3 pages

*Ensures <img> elements have alternate text or a role of none or presentation*

4

### Links with the same name must have a similar purpose

Minor

8 instances across 2 pages

*Ensure that links with the same accessible name serve a similar purpose*

5

### Heading levels should only increase by one

Moderate

5 instances across 2 pages

*Ensures the order of headings is semantically correct*

## Most Common Issues (Page 2 of 2)

6

### Headings should not be empty

Minor

3 instances across 1 page

*Ensures headings have discernible text*

# Testing Methodology

Comprehensive Testing Framework & Approach

## Testing Methodology

### Automated Testing

Comprehensive automated accessibility testing using axe-core v4.3.5

- 86 different accessibility checks
- WCAG 2.1 AA compliance validation
- Real-time issue detection

### Visual Assessment

Manual review of visual elements and user interface components

- Color contrast analysis
- Visual hierarchy evaluation
- Layout and spacing review

### Keyboard Navigation

Testing keyboard accessibility and navigation patterns

- Tab order validation
- Focus management review
- Keyboard shortcuts testing

### Screen Reader Testing

Compatibility testing with assistive technologies

- Screen reader compatibility
- Alternative text validation
- Semantic structure review

# Test Results Summary

Comprehensive Accessibility Audit Results

## Test Results Overview

**Passed Tests:** These are accessibility tests that the website successfully passed, indicating good accessibility practices are already in place.

**Inapplicable Tests:** These tests were not applicable to the current website content and structure, meaning the elements they test for don't exist on this site.

## **Accessibility Audit Report**

<https://www.abccorp.com/>

This comprehensive accessibility audit has identified key areas for improvement to ensure your website meets WCAG 2.1 AA standards. The findings presented in this report provide a clear roadmap for enhancing accessibility and creating a more inclusive digital experience for all users.

We recommend prioritizing the critical and serious issues identified, as these have the most significant impact on user accessibility. The moderate issues, while less urgent, should also be addressed to achieve full compliance.

---

Thank you for choosing White Label IQ for your accessibility needs. We're committed to helping you create inclusive digital experiences.
